About Show

"14th Rice Tech Asia Exhibition & Conference -2026", November 05-07, 2026 at ICCB, Dhaka, Bangladesh.

Rice Tech Asia is the leading international exhibition and conference dedicated to the rice industry, rice processing technology, grain storage solutions, bran processing, milling equipment, packaging technology, logistics, and agricultural innovations. The exhibition will bring together rice millers, exporters, importers, technology providers, machinery manufacturers, government agencies, research institutions, investors, and industry professionals from Bangladesh and around the world.

As Bangladesh is one of the world's largest rice-producing and rice-consuming countries, the event provides a unique platform for business networking, technology transfer, investment opportunities, and market expansion within South Asia's rapidly growing rice sector. Focus Areas of the Exhibition:

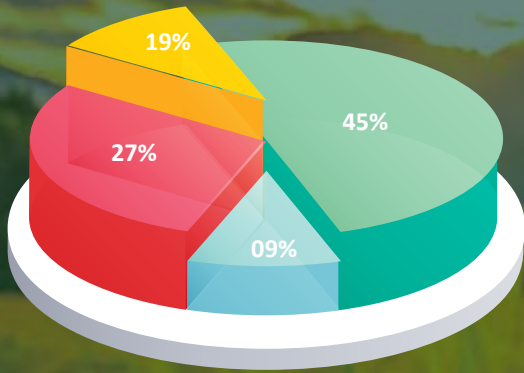

Covering the Complete Rice Value Chain – From Paddy to Distribution

Industry Overview

Bangladesh is one of the world's largest rice-producing and rice-consuming countries, making the rice industry a cornerstone of the nation's food security, agricultural economy, and rural employment. With a growing population, rising food demand, and increasing consumer preference for high-quality rice, the industry is undergoing rapid modernization and technological transformation. Thousands of rice mills across the country are investing in advanced machinery and processing technologies to improve efficiency, enhance product quality, and reduce operational costs.

The demand for modern solutions in Paddy Handling, Pre-Cleaning, Grain Storage, Silo Systems, Parboiling, Drying, Milling, Color Sorting, Bran Processing, Packaging, and Distribution is growing significantly. In addition, Steam Generation, Boiler Systems, Automation, Smart Monitoring, and Quality Control Technologies are becoming essential components of modern rice processing operations. To reduce post-harvest losses, improve productivity, optimize energy consumption, and meet international quality standards, rice millers and processors are increasingly adopting advanced technologies and automated systems.

The Government of Bangladesh is also placing strong emphasis on food security, modern grain storage infrastructure, agricultural mechanization, and agro-industrial development. As a result, substantial investment opportunities are emerging in grain storage, warehouse management, smart farming, food processing, and supply chain solutions. Furthermore, the expansion of Rice Bran Oil production, value-added rice products, and export-oriented processing industries is creating new business opportunities for international technology providers, machinery manufacturers, and service companies.

Against this backdrop, the 14th Rice Tech Asia Exhibition & Conference 2026 provides a unique platform for global technology suppliers, machinery manufacturers, rice mill owners, traders, importers, exporters, investors, and industry professionals to connect and explore business opportunities. The exhibition enables participants to strengthen their brand presence, meet qualified buyers, establish distribution networks, develop strategic partnerships, and gain direct access to one of South Asia's most dynamic and rapidly growing rice processing markets.
